VASE Dynabass 1k Classic Bass Amplifier

Modern Design 1000 Watt Class D Head with 5 Band Tonal Contouring

\$1,695.00

The VASE Dynabass 1K Classic has been designed to provide an amplifier which uses state of the art electronic technology while retaining the traditional physical appearance of the instrument amplifiers of yesteryear.

Utilizing the combination of a low noise JFET Preamplifier, 5 Band Tonal Contouring and an ultra efficient 1000Watt Class D Power Amplifier, the Dynabass 1k Classic offers the discerning bass musician a wide range of tonal textures to enhance any style of playing technique.

The unique design of the preamplifier section coupled to the high-power amplifier delivers an extremely fast transient response which many players prefer over the more conventional tube designed amplifiers.

The Dynabass 1k Classic offers great flexibility by providing a dedicated Tuner Output, Input Mute Switch, Direct Signal Output (with Pre/Post EQ selection) and an Effects Send and Return. Combine this capability with the legendary robust VASE build quality and the result is an instrument amplifier equally at home on tour or in the studio

Dynabass 1K Classic

Specifications:

Instrument Input	Suitable for active and passive basses	Construction	One piece 1.2mm steel chassis. Black powder coat finish. 18mm Finnish Birch ply cabinet fitted with heavy duty handles & rubber feet.
Gain Control	Adjusts input gain for active and passive basses	Standard Finish	Black textured AcoustiCoate elastomer finish. Black trim cloth.
Tone Controls	Five active Band Pass Filters providing Boost / Cut at Ultra Lo, Low, Mid, High & Super High Frequencies	Optional Vinyl Colours	Black Stump, Full Cream, True Blue, Great White
Volume Control	Master output control	Optional Trim Cloth Colours	Black, Silver, Vintage, Heritage
Output Power	1100 Watts into 4 Ohms 525 Watts into 8 Ohms	Weight	10.5 Kgs
Overdrive Character	The power amplifier features a Soft Limit circuit that shapes the preamplifier signal eliminating saturation/clip in high level situations
